

# LIVING INFRASTRUCTURES

## Destruction of natural reed beds in Lake Balaton

# Quality distribution of reed between 2003 and 2020

Panoráma

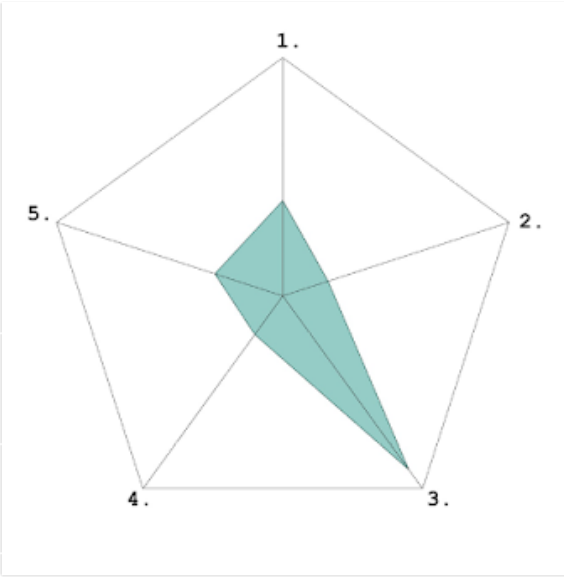

Design and evaluation of support geometries for our NbS

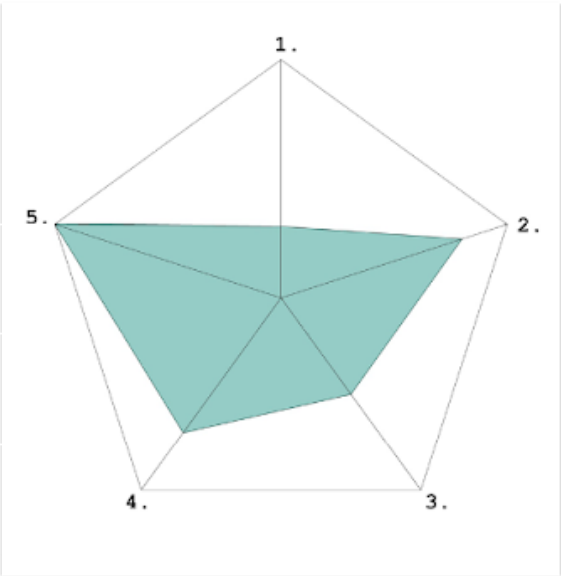

**Name:** A(1,2)  
**Weight(kg):**8.3  
**Size (mm) (x,y,z):**  
400x346x373  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

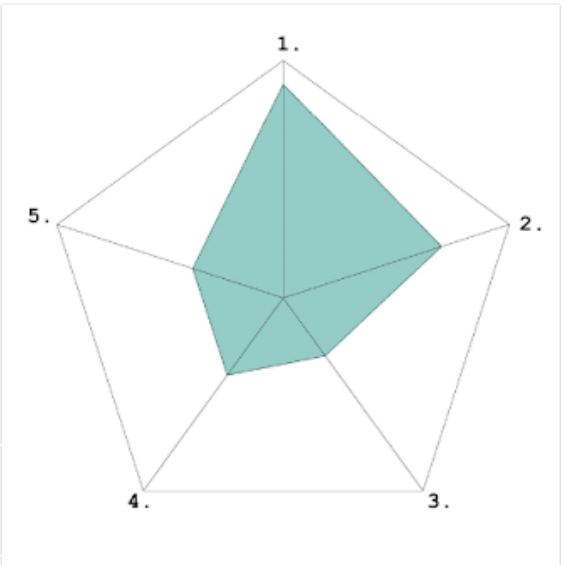

**Name:** B(1,2)  
**Weight(kg):**14.9  
**Size (mm) (x,y,z):**  
400x345x375  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

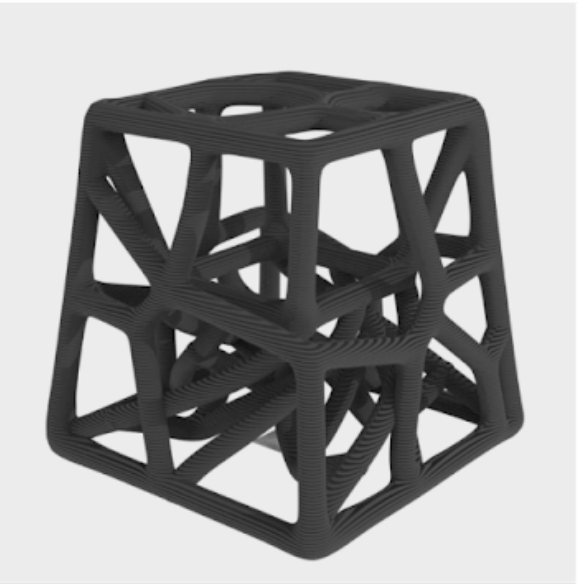

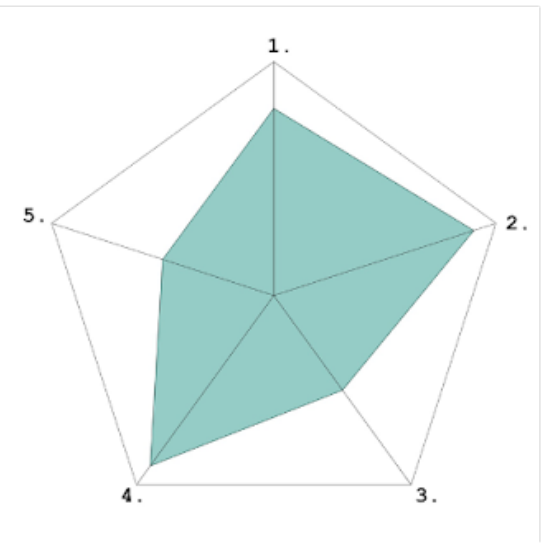

**Name:** C(1,2)  
**Weight(kg):**15.81  
**Size (mm) (x,y,z):**  
415x393x419  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

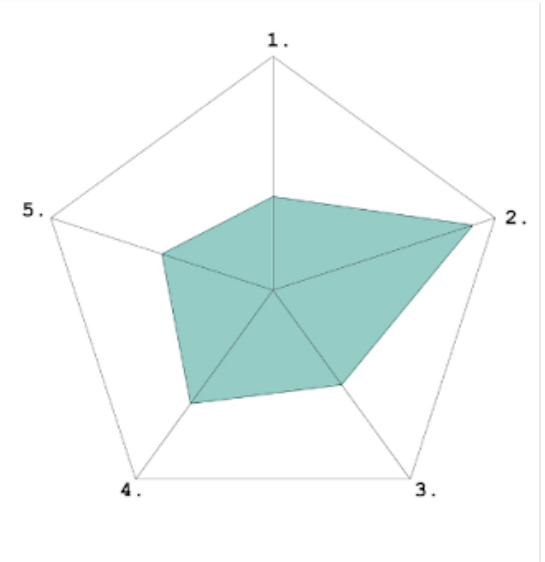

**Name:** D(1,2)  
**Weight(kg):** 18.23  
**Size (mm) (x,y,z):**  
431x431x427  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

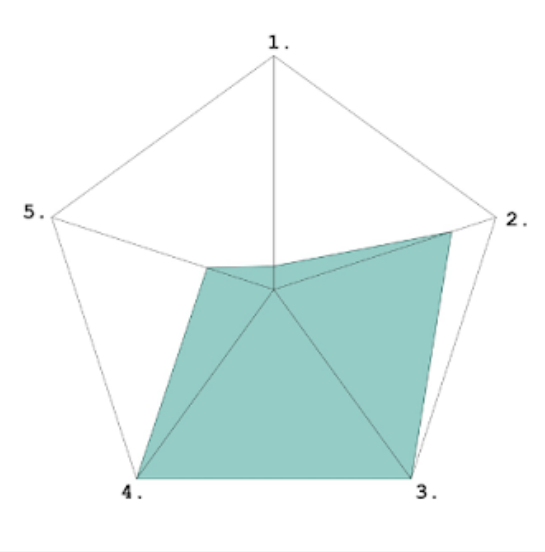

**Name:** E(1,2)  
**Weight(kg):**27.85  
**Size (mm) (x,y,z):**  
433x433x430  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

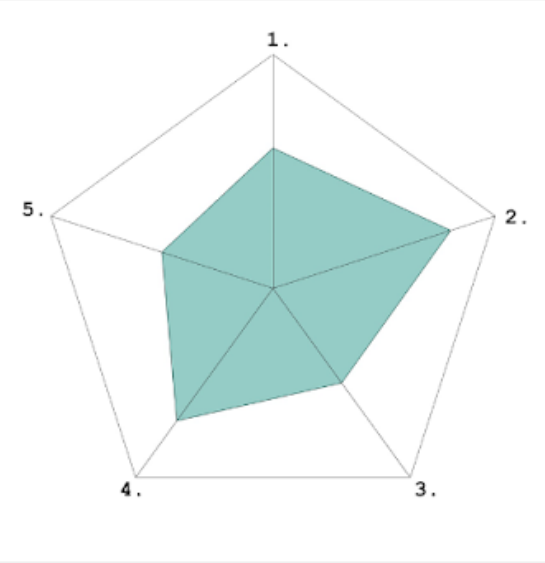

**Name:** F(1,2)  
**Weight(kg):**22.3  
**Size (mm) (x,y,z):**  
437x437x430  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

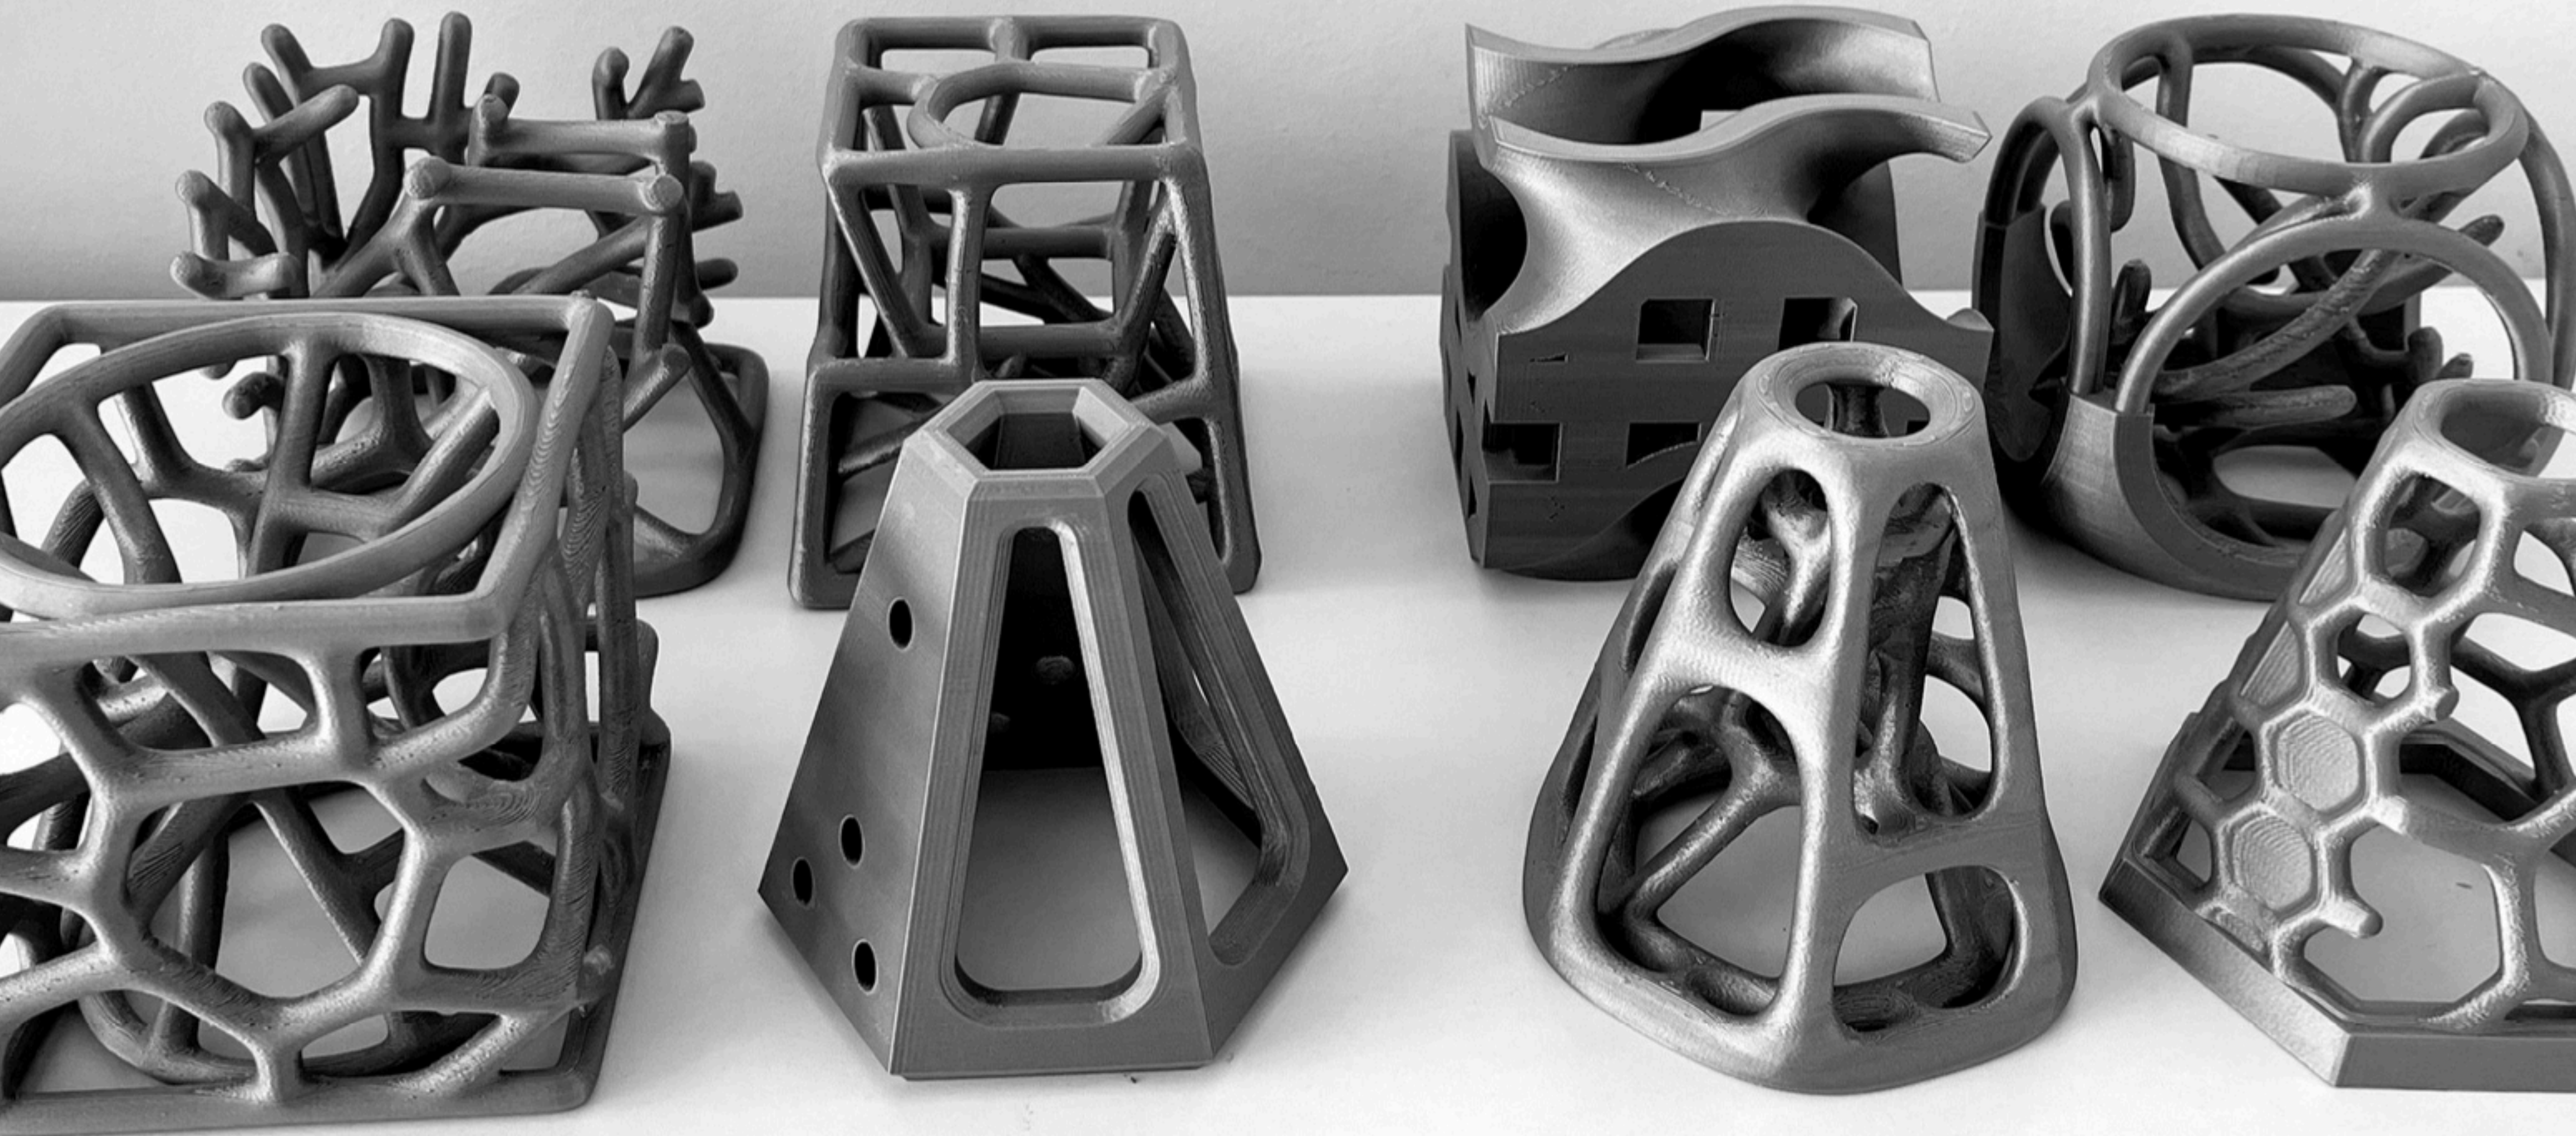

**Name:** G(1,2)  
**Weight(kg):**47.6  
**Size (mm) (x,y,z):**  
400x400x400  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

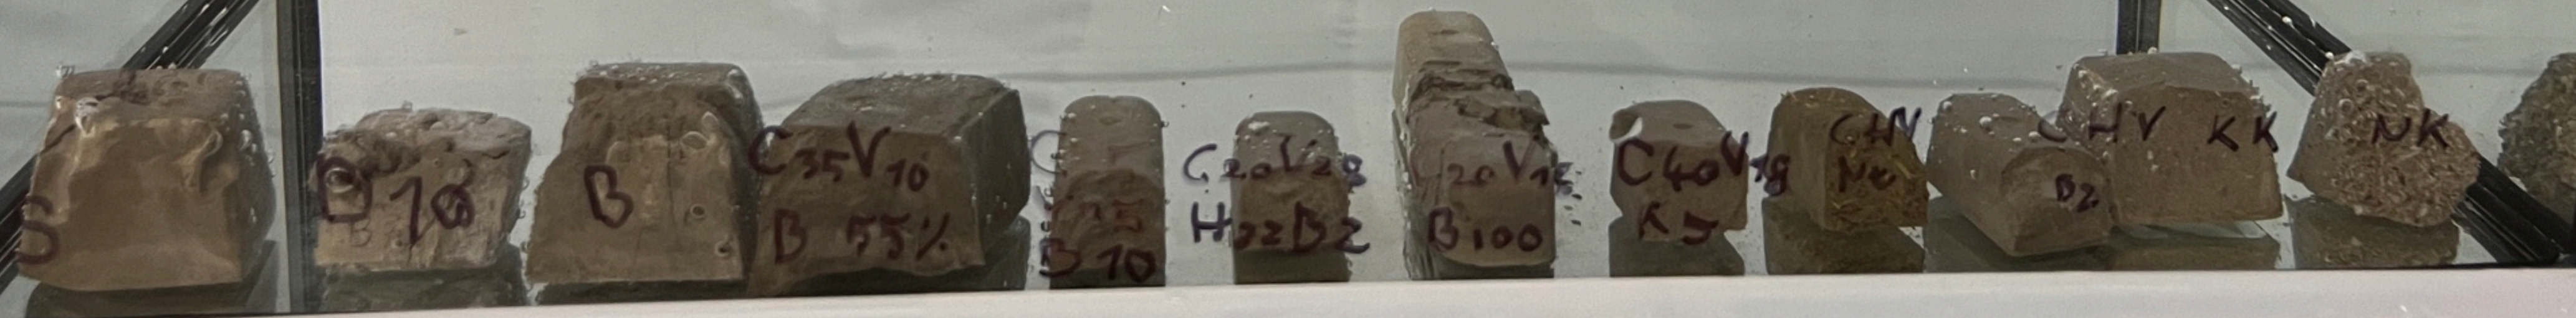

**Name:** H(1,2)  
**Weight(kg):** 27.85  
**Size (mm) (x,y,z):**  
430x430x417  
**Function:**  
1. Light transmission  
2. Rhisome support  
3. Wave protection  
4. Density  
5. Collect sediment

# Prototyping

Testing the  
material

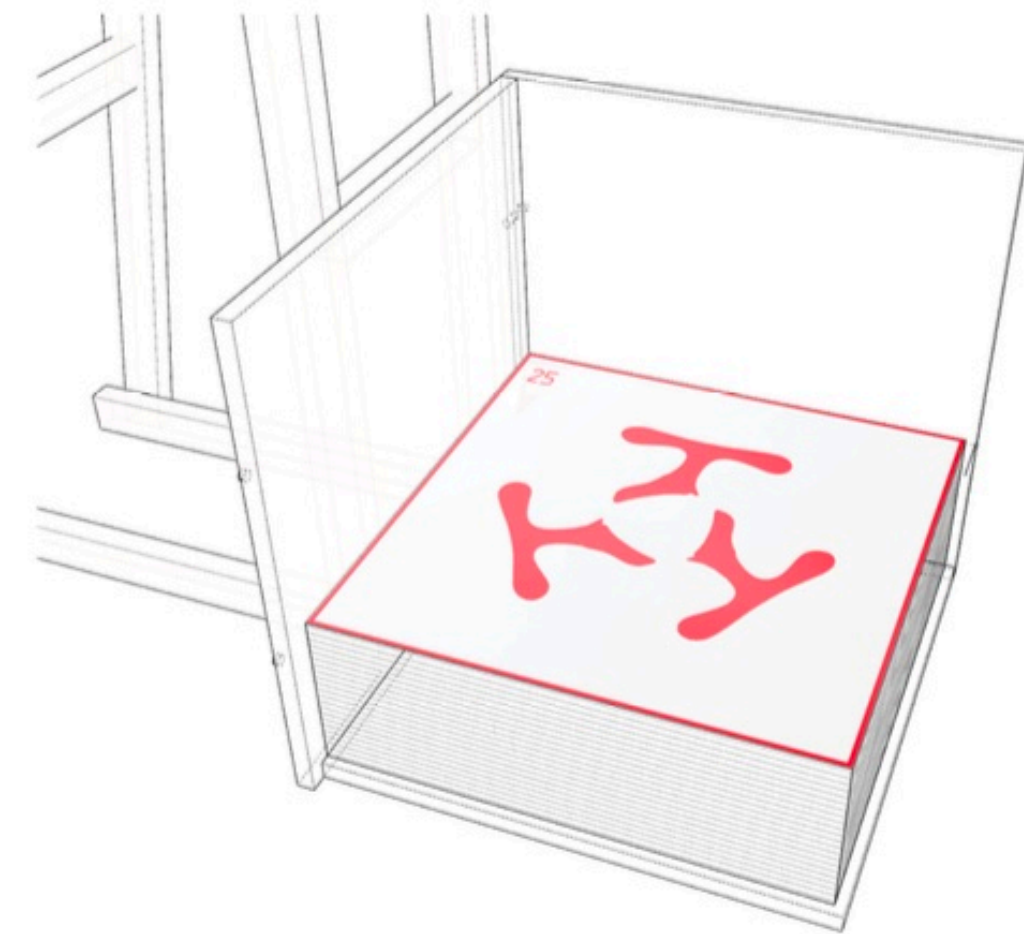

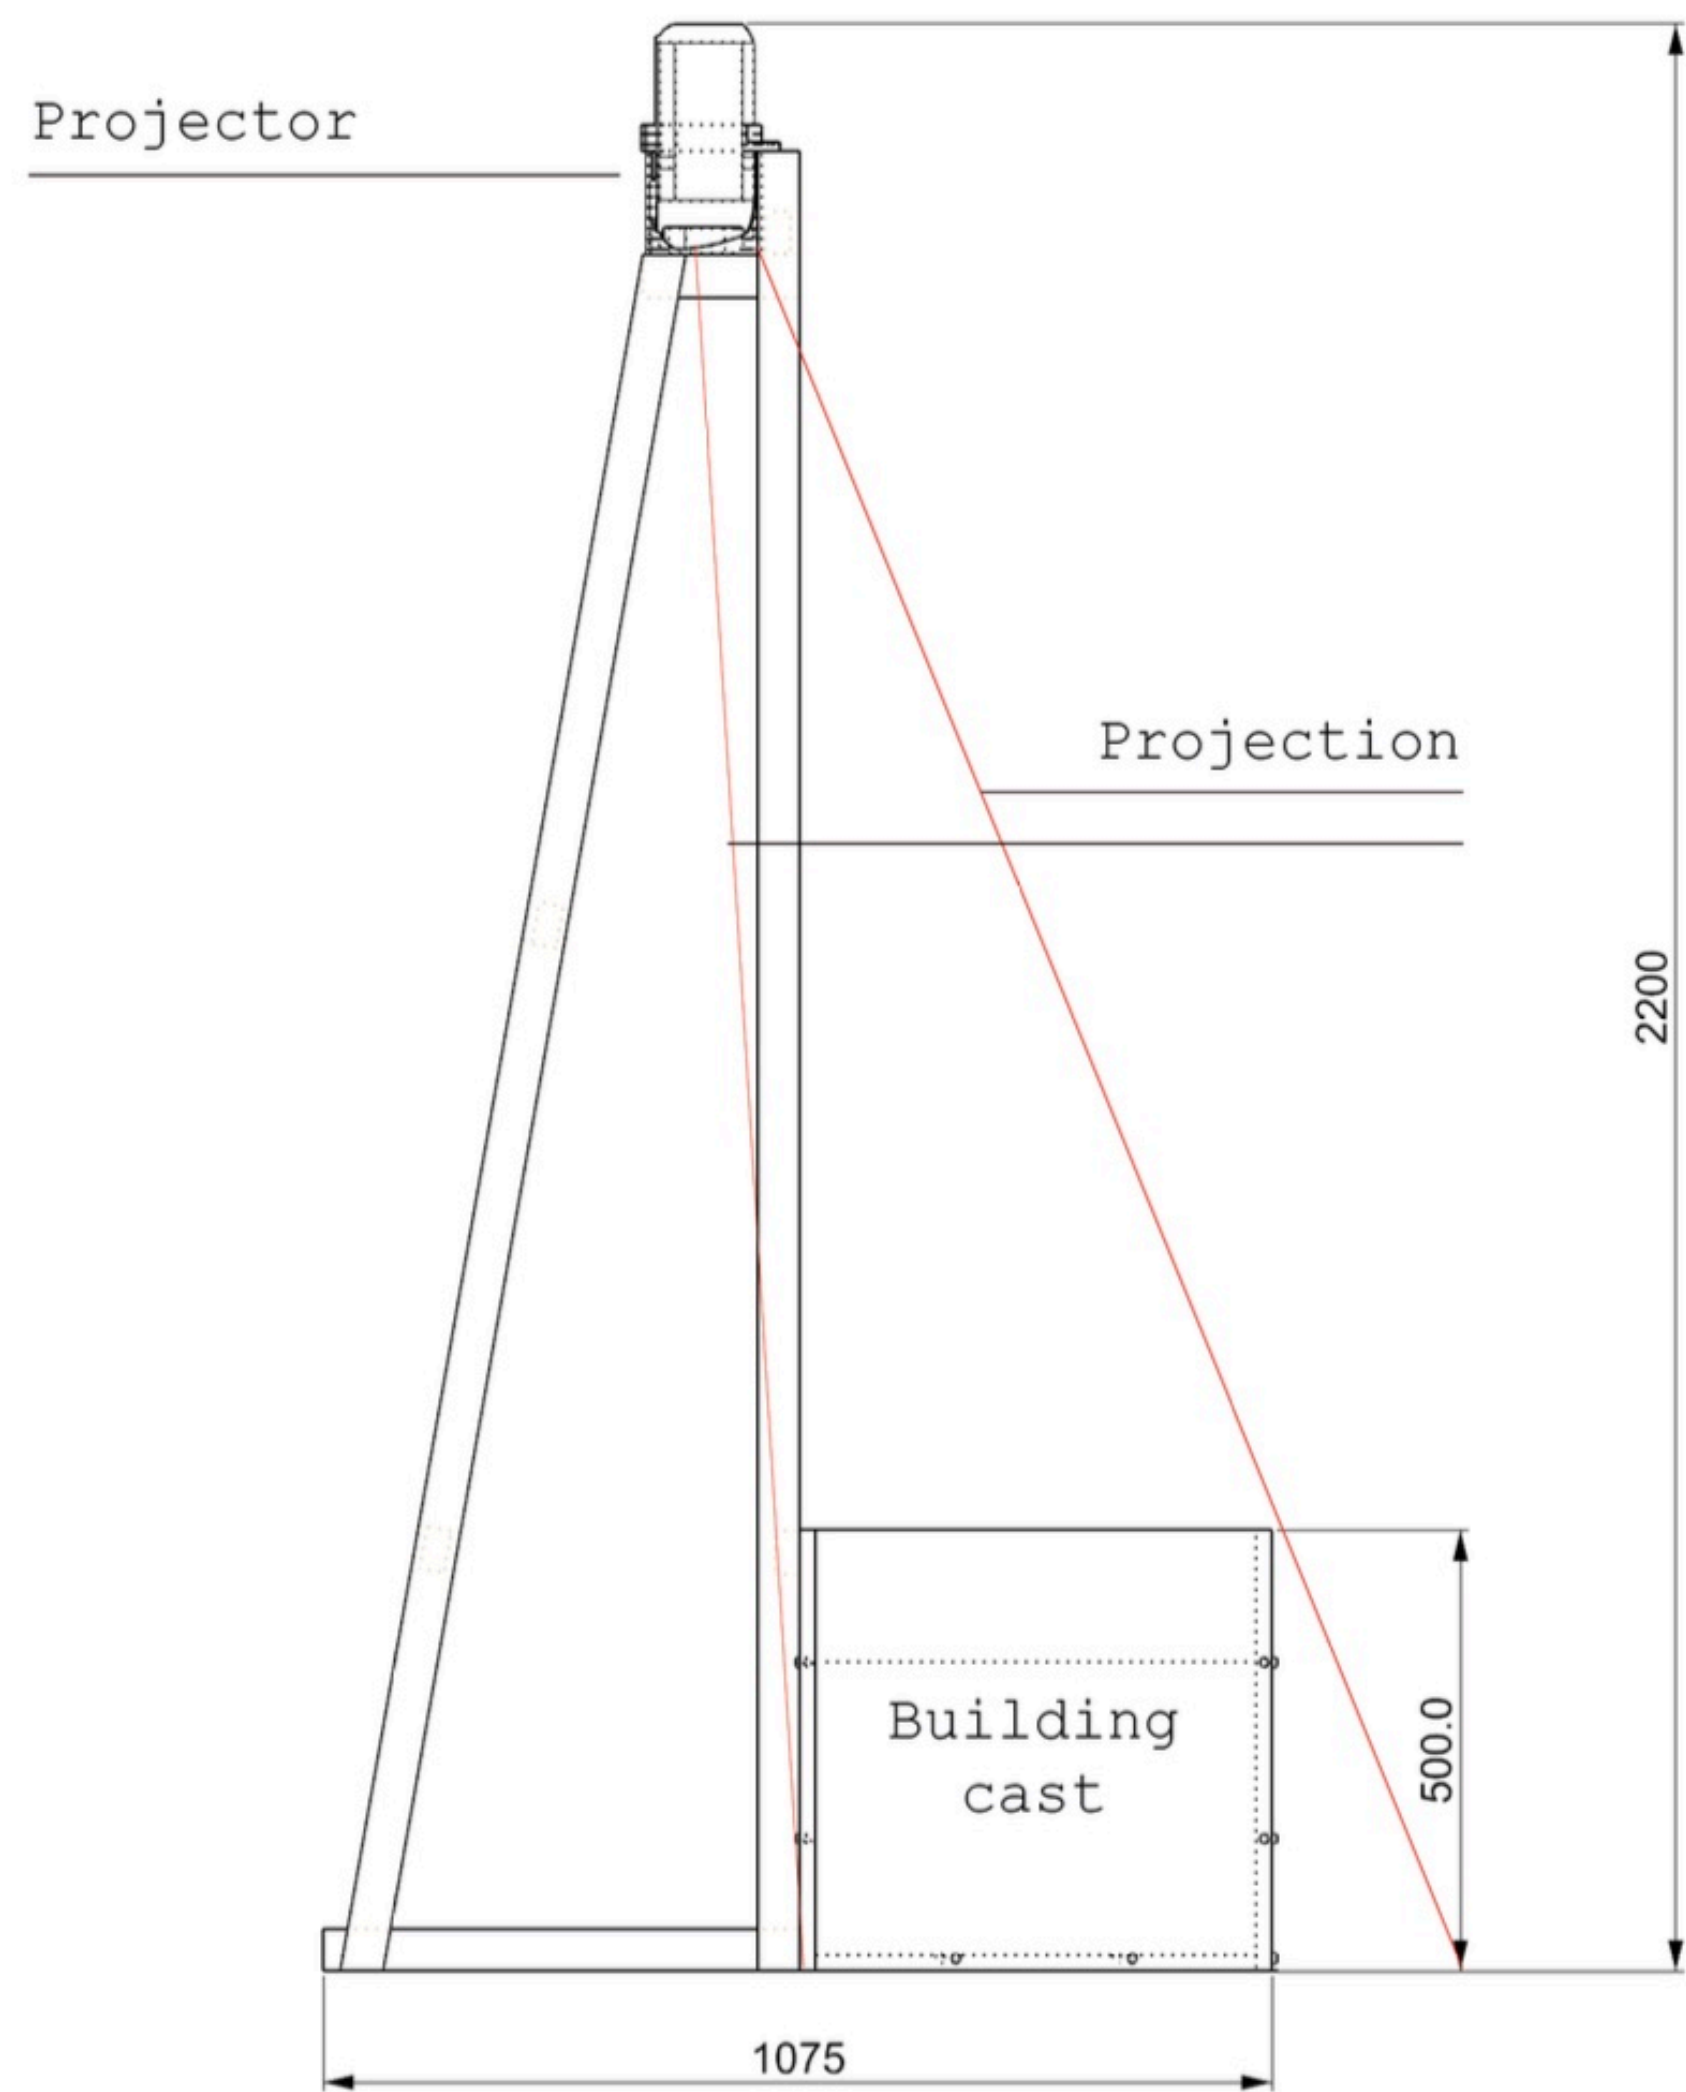

Developing the  
know-how

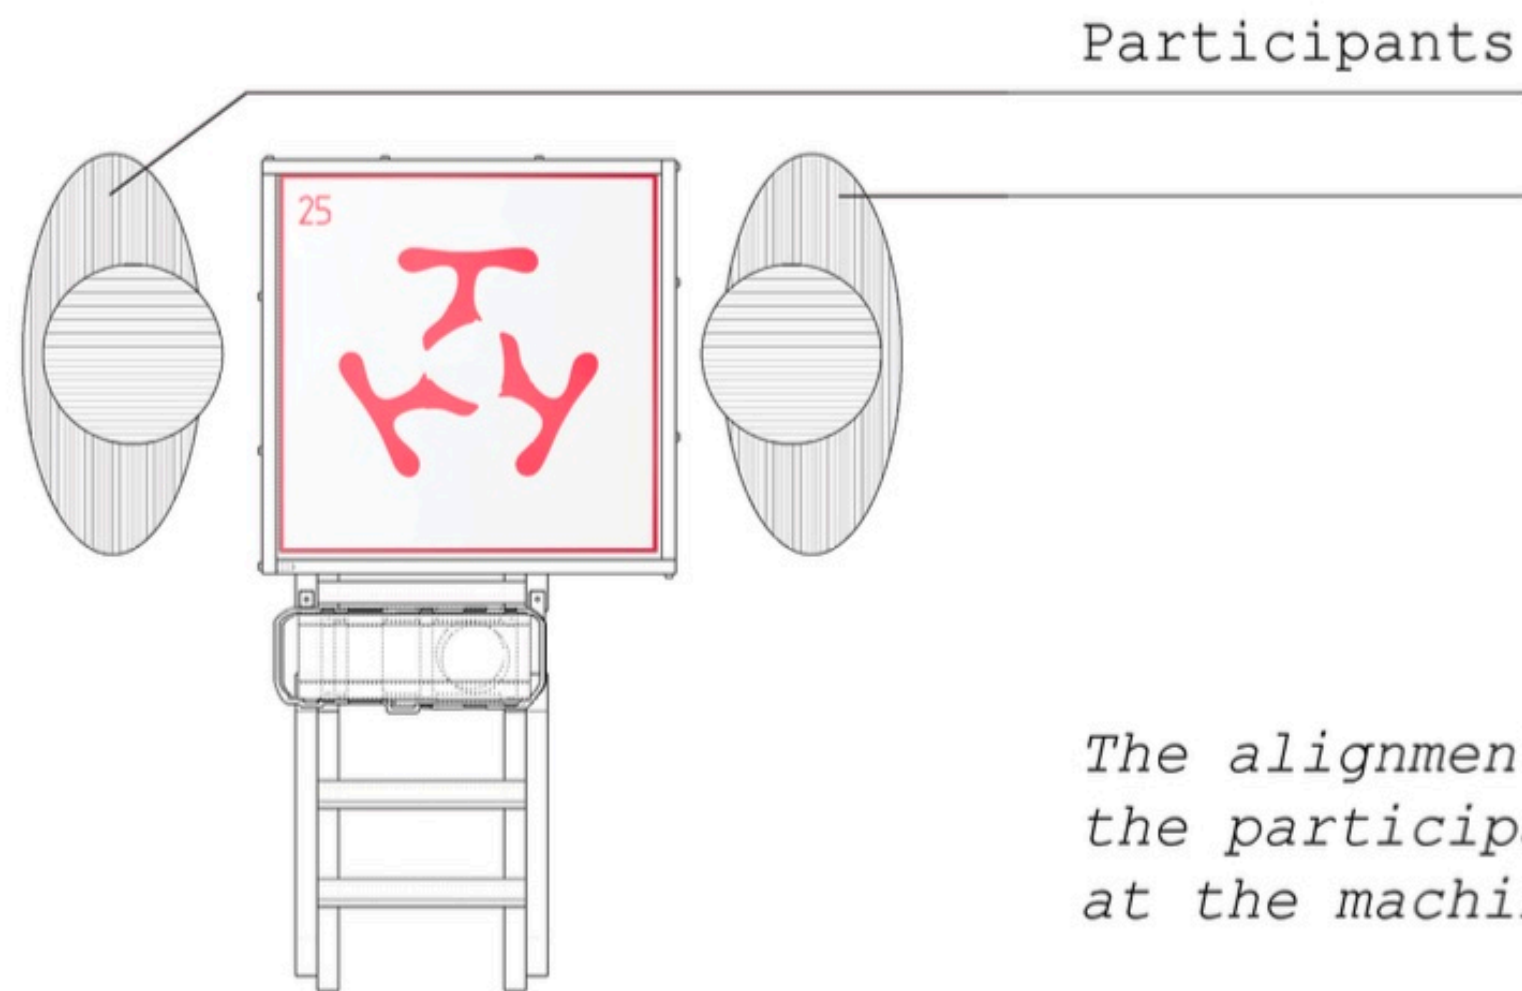

Proof of Concept

Planing for the  
scale-up processes

*Example of a  
projected layer.  
Currently showing  
layer 25.*

*The alignment of  
the participants  
at the machine.*
